

the big picture.

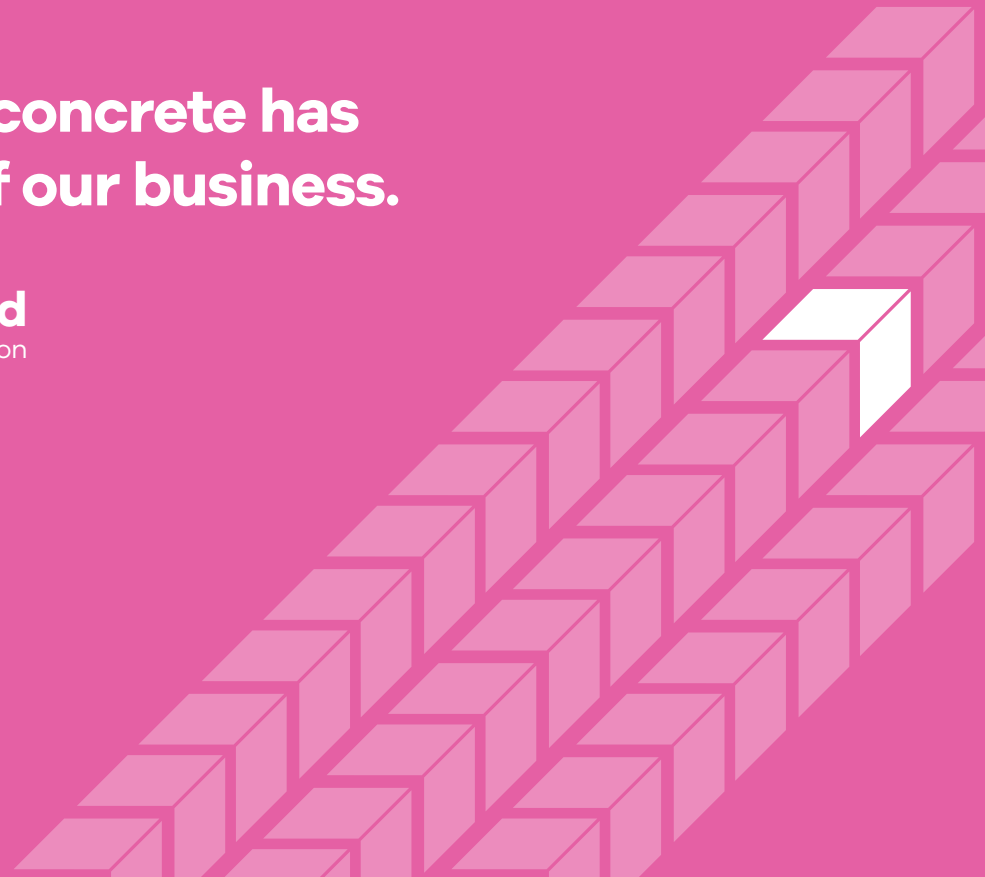

our capabilities

we know **concrete.**

**“ For the last 20 years concrete has
been the foundation of our business.**

— Tim Collard
General Manager, Mitcon

As the company has grown and evolved, we have developed the ability to respond quickly and plan effectively, enabling us to mobilise to remote and distant locations with minimum fuss. We launch out across Australia from our home base in Rockhampton and continually keep excellence at the core of who we are.

story.

Mitcon Projects is based in Rockhampton and was established some 35 years ago. From humble beginnings we have grown and evolved such that we now hold a proud reputation for being a leader in the concrete construction industry within both Queensland and interstate. This history of experience makes us a valuable partner on your next construction project.

Projects we have completed in the early years were predominantly Queensland based. As the company evolved and grew, we developed the ability to respond quickly and plan effectively which has enabled us to mobilise to remote and distant locations with a minimum of fuss.

We have been involved in all aspects of civil, mining, commercial and industrial concrete works including survey/set-out, earthworks, reinforcing, formwork, tilt panels, airfield pavement concrete and general concrete place and finish.

We enjoy a reputation of being able to produce a quality product within a tight timeframe whilst maintaining an extremely high standard of safe work practices.

 **mission.**

We strive to consistently deliver a quality product for our clients, within the required timeframes while building a relationship that makes us a trusted and reliable partner for future projects.

We place our people at the core of our business and ensure that we provide them all a safe and positive workplace.

By delivering for our clients and our people we allow the business to grow and support our development.

Our most important resource is our management team and key site workers.

Mitcon has the capability to take projects from start to completion with our wide array of resources and personnel.

Concrete construction services:

- Detailed Excavation and backfill (engineered)
- Concrete supply, place and finish
- Concrete Pumping
- Concrete Batching
- Concrete Tilt panels
- Concrete Precast Products
- Reinforcement supply and fix
- Formwork supply, erect and dismantle
- Underground conduit and direct buried services
- Supply and install of Embedment elements
- Labour Hire Services
- Surveying

Construction workers:

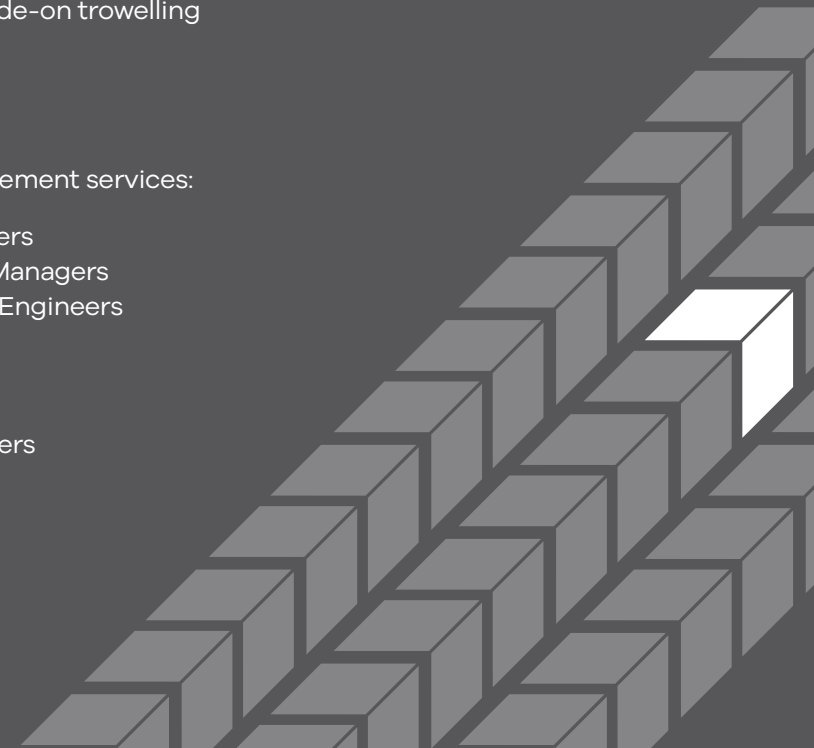

- Leading hands
- Form workers
- Steel fixers
- Concreters
- Scaffolders
- Riggers
- Experienced Construction Labour

Plant and equipment includes:

- 40t Rough Terrain Crane
- 20tn Komatsu Excavator
- 13tn Komatsu Excavator
- 12tn Cat Excavator
- 6tn Hitachi Excavator
- 4.5tn Hitachi Excavator
- 1.5tn Excavator
- Bobcats
- CopperHead laser screed
- 5x twin head ride-on trowelling machines
- Various trucks
- Light vehicles
- Extensive range of formwork systems
- Trowelling machines
- Drive motors
- Whips
- Screeds
- Hand-tools

Construction management services:

- Project Managers
- Construction Managers
- Senior Project Engineers
- Site Engineers
- Planners
- HSE Advisors
- Quality Engineers
- Supervisors

A construction site at dusk. A concrete pump truck with a long boom is positioned on the left, pouring concrete into a formwork structure. Several workers in high-visibility vests and hard hats are visible on the site. The background shows trees and a building under construction. The sky is a mix of orange and purple from the setting sun. The entire image has a semi-transparent pink overlay.

we guarantee **quality**.

We pride ourselves on offering a quality product which is backed up by a robust Quality Management System (QMS). After contract award we tailor our company QMS to suit the individual needs of each project and client.

we prioritise **safety**.

Our company has a comprehensive Workplace Health and Safety system that is rigorously enforced. We actively encourage and promote safe work practices in the workplace, through the engagement of our workers in preparing Safe Work Method Statements, Standard Work Procedures, JSAs and Start Cards. We believe that successful engagement of our workers is the key to safety.

we value **standards**.

We hold a current QBCC Open Builder Licence (#1056945). We actively encourage and support our engineers and management in gaining professional recognition with their respective governing bodies.

we engage **community**.

Excellence in community engagement is pivotal in what we do on each of our projects here at Mitcon. Careful and considered engagement within local communities ensures our projects are executed with a well-educated, thorough plan - a plan that has everybody in mind. We value diversity in the workplace and firmly believe that successful inclusion is the key to a winning team. With this in mind, every project makes meeting their diversity targets a priority.

our people

tim collard
GENERAL MANAGER

Tim Collard has 35 years' multidisciplinary corporate and construction management experience. As director and general manager of Mitcon, he provides strength in construction management, strategic corporate direction and new business development. Tim's commitment, drive and passion provides inspiration, whilst also focusing on productivity, quality and safety performance.

richard mcknight
CONSTRUCTION MANAGER

Richard McKnight brings nearly 18 years of experience to Mitcon Projects, backed by invaluable industry knowledge and practice. Richard specialises in direct delivery of concrete structures, causing him to be a leader in this field of such a highly-complex industry. His skills have been highly sought after with demonstrated excellence in carrying out a variety of complex projects in a vast array of sectors.

andrew tickner
FINANCIAL CONTROLLER

With vast experience, qualifications and memberships with CPA Australia, NTAA and the Taxation Institute of Australia, Andrew is skilled in business management, accounting and taxation matters. Having displayed a strong wealth of knowledge and adaptability, Andrew has used his skills in various industry backgrounds. Undertaking CFO and COO roles within Mitcon Projects, Andrew also handles compliance management alongside his accounting role.

mark prosser
WORKSHOP MANAGER

As a long-term employee at Mitcon, Mark has put his diesel fitter trade background and wealth of knowledge to good use in his role as workshop manager. For the past decade Mark's attention to detail has ensured that our projects have run smoothly and efficiently.

brent maskell
ESTIMATOR

Brent's experience in engineering and management roles have seen him handle his role as estimator with great expertise. With 18 years in working with concrete structures in both large scale and smaller contractors and subcontractors, Brent has strong knowledge and demonstrated professional practice in civil, commercial and residential sectors nationally and internationally.

peter de mattia
SENIOR PROJECT ENGINEER

Peter completed his civil engineering degree in 2015 whilst working for a large civil construction company in NSW. Peter started out in 2010 as a general labourer and progressed his career rapidly in the civil construction environment. Prior to joining the Mitcon Projects team he has completed various civil concrete projects as both the contractor and the consultant supervising construction. Since joining Mitcon Projects Peter has been the Senior Project Engineer on site managing 6 separate construction packages.

anthony quinn
PROJECT MANAGER

Anthony is an accomplished Civil Engineer and completed his degree in 2012 (IRE). Since completion has worked his way up to Project Manager on various projects across the United Kingdom, New Zealand and Australia. He brings an enthusiastic approach and vast depth of experience having been involved in some very complicated civil engineering construction projects. His experience is very balanced between hands on construction and overall management of projects.

ludmilla resende
SENIOR PROJECT ENGINEER

Ludmilla is a Civil Engineering Professional with a track record of undertaking medium to large scale infrastructure and residential projects for clients from diverse backgrounds. With close to 8 years experience, she brings to Mitcon a unique combination of project management skills complemented by hands-on site supervision experience to deliver concrete structure projects efficiently and safely.

our people.

robert newton.
UNDERGRADUATE ENGINEER

Robert is office-based and assists our project-based site team in an engineering support role. He is pivotal in the completion and submission of quality assurance and final handover documentation.

darren neil.
SITE MANAGER

Darren has been with Mitcon for close to 11 years of his 40 years experience in the construction industry. Darren has strong knowledge across all aspects of concrete, formwork & steel fixing in commercial, industrial, civil and aircraft pavement construction. Darren has displayed integrity & fairness in the management of staffing levels up to 120 workers and is an integral member of the Mitcon teams across all departments.

stacey lucas.
ADMINISTRATION MANAGER

With 20 years' experience in the construction industry, Stacey brings with her an extensive knowledge base in managing accounts. Stacey works across all aspects of office management and hr and is now responsible for maintaining the smooth operation of all of Mitcon's behind the scenes operations.

makala ryan.
ADMINISTRATION TRAINEE

Makala has joined our team as an administration trainee and has fast become an important part of our team.

recent projects

We demonstrate the skills and resources that should be considered a valuable asset to your project. With many changes and advancements over the years, one thing has remained the same at Mitcon: our commitment to achieving construction excellence in partnership with our clients.

We strive for solutions that give our clients true value for money and we help to solve our clients' toughest concrete construction challenges.

We believe that we can achieve the goals of your project in a safe, timely and cost-effective manner.

Capricornia Correctional Centre Expansion Project

DATES
September 2018 - ongoing

LOCATION
etna creek, qld

CLIENT
cpb contractors

BUDGET
\$12,000,000

WORKS
concrete form, reinforcement + pour

Most works will be undertaken within the existing operating centre including 164 new residential cells in seven new buildings, 100 secure cells, perimeter and site wide electronic security system upgrade with new facility rooms and walkways linking the buildings.

Mitcon Projects have been contracted to complete the full FRP package (including concrete supply & install) covering 18x individual buildings and associated pavement works.

Works will include all detailed excavation, footings/ground slab, installation of all precast decks, topping slabs and detailed pumping methodology inside a secure environment.

BFA Project - RAAF Base Amberley

DATES
completed 2019

LOCATION
amberley, qld

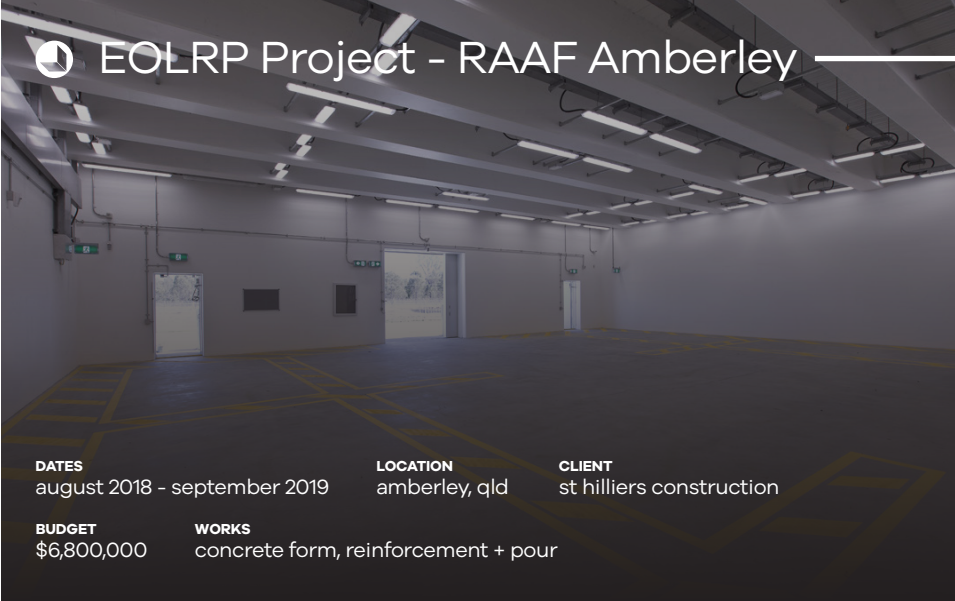

CLIENT
laing o'rouke

BUDGET
\$13,000,000

WORKS
concrete form, reinforcement + pour

The Battlefield Airlifter project at RAAF Amberley is providing new support and training facilities for the introduction of the C-27J Battlefield Airlift aircraft.

Our contract included the full FRP package (including concrete supply and install) required to construct the training facility, hangars and headquarters.

🕒 EOLRP Project - RAAF Amberley

DATES august 2018 - september 2019	LOCATION amberley, qld	CLIENT st hilliers construction
BUDGET \$6,800,000	WORKS concrete form, reinforcement + pour	

The Australian Defence Force are enhancing defence capabilities with the construction of new explosive ordnance storage facilities. The \$210M reform program upgrades existing storage capacity across the explosive supply chain network and RAAF Amberley is just one of the sites.

Mitcon Projects were contracted to complete the full FRP package (including concrete supply and install) of approximately 5400m³ which includes 2x ECB's, 8x buildings + associated columns/walls and suspended slabs, over 180m of 5m high retaining wall & footing + various retaining walls over 3.5m and all civil pavements for the complex.

🕒 RAAF Tindal

DATES june 2018 - december 2019	LOCATION tindal, nt	CLIENT lend lease building	BUDGET \$20,000,000
WORKS concrete form, reinforcement + pour			

The RAAF Base Tindal is located 15km from the town of Katherine and is undergoing a 5th redevelopment project.

The Australian government is investing approximately \$470 million to be spent on providing new and upgraded facilities and infrastructure to support the introduction of the joint strike fighter F-35A aircraft at Tindal Airbase in Katherine.

Mitcon Projects is the principle FRP contractor for this project. The major buildings included a multi-story HQ/Hanger complex, training facility, maintenance workshop and various other smaller buildings. The project consists of approximately 15,000m³ of concrete.

Shoalwater Bay Training Area Remediation Project

DATES august 2020 - december 2021 **LOCATION** shoalwater bay, qld **CLIENT** downer/FK gardner JV

BUDGET \$5,600,000 **WORKS** concrete panels, fabricate + install package

DATES august 2021 - may 2022 **LOCATION** shoalwater bay, qld **CLIENT** allroads pty ltd

BUDGET \$1,500,000 **WORKS** concrete package

The \$135 million remediation project aims to enhance the quality and longevity of existing facilities over a 2-year timeframe on the Shoalwater Bay Training Area, to enable continued environmental sustainability for Australian Defence Force exercises and increase Defence's Amphibious training capability.

Mitcon projects are responsible for the manufacture and install of concrete tilt up panels to 17 buildings. Work activities on the project include shop drawing and temporary works co-ordination, formwork, reinforcement and concrete place and finish to panels, erection and propping of panels, grouting and joint sealing.

Australian-Singapore Military Training Initiative Project

DATES february 2021 - ongoing **LOCATION** shoalwater bay, qld **CLIENT** laing o'rourke

BUDGET combined budget \$21,000,000

WORKS 5 concrete packages covering formwork, reinforcement, concrete works, concrete pavements and civils

The Shoalwater Bay Training Area (SWBTA) is one of Australia's key Defence training areas, and its expansion will not only deepen our Defence relationship with Singapore but also support economic growth in the region. By the end of 2026, 14,000 Singaporean personnel will spend 18 weeks annually in the Shoalwater Bay Training Area.

The initiative provides the Singapore Armed Forces (SAF) with increased access to Australian military training areas and is an important way of strengthening Australia's bilateral Defence relationship with Singapore.

Mitcon Projects are delivering the full FRP package across 30 buildings - this includes the provision of all labour, plant, equipment, and materials to complete the works. Work activities include detailed excavation, steelfixing, formwork and concrete place and finish for footings, ground slabs and suspended slabs.

recent projects

Gus Moore Drive Subdivision

DATES
february 2022 - august 2022

LOCATION
gus moore drive, yeppoon

CLIENT
JRT civil

WORKS
formwork, reinforcement + concreting

Mitcon Projects provided formwork, reinforcement and concreting services to the Gus Moore Street wall remediation works for the Livingstone Shire Council, working under JRT Civil. The contract involved the construction of a raking soldier pile retaining wall built on challenging terrain with an architectural finish.

Alliance Airlines - Rockhampton Airport

DATES
july 2021 - may 2022

LOCATION
rockhampton airport

CLIENT
BMD constructions

WORKS
formwork, concrete placement, curing + saw cutting

The Embraer E190 is one of 30 newly acquired aircraft Alliance is adding to its regional fleet with a contract to build a hangar and maintenance facility at Rockhampton Airport to help service the airlines entire fleet of over 70 aircraft.

Rockhampton Airport will be home to Alliance Airline's new maintenance and repair facility after the airlines decision to return to Queensland from overseas. The new maintenance and repair facility in Rockhampton could potentially create 225 jobs and inject \$30 million into the local economy every year.
